REVOLUPLAST

VOS BOITIERS AUTREMENT - SUR MESURE - SANS FRAIS DE MOULE

You are looking for a simple plastic transformation process, efficient, fast and affordable to manufacture your new plastic part?

What sets us apart

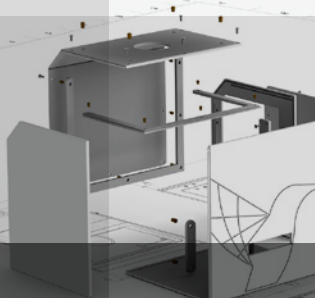

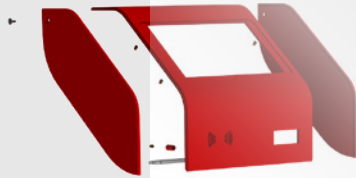

- Our moldless manufacturing process
- Our effective industrial tool dedicated to small and middle sized series
- Manufacturing of a prototype before the start of serial production
- Customisation tools : digital and screen printing, painting...
- All the production steps on the same manufacturing site in France
- Many years of experience

What we put at your disposal

- A short design-conception-manufacturing cycle
- Our quality and customers relationship commitment
- An available technical and commercial team
- A unique interlocutor throughout your project
- An available and varied stock of raw materials

What you would gain from working with us

- Specific Intergration solutions
- No costly investments
- Mechanical changes between 2 series are possible
- Quality products

The shape of your product and your quantities do not require a mold.
Entrust us with your project !
